

Assignment 1

Christina Lam

Team Project Brainstorm

- **Data/Research Question**

- Cardiovascular Disease Dataset from Kaggle
- How do different variables affect heart healthy and heart unhealthy participants?

- **Hypothesis**

- Vegetable and fruit consumption along with general health will have an inverse relationship with CVD while every other variable has a direct relationship with CVD

- **Data Collected & Stored**

- Random Forest ML

- **Methods**

- Random Forests, Decision Trees

- **Collaboration & Teamwork**

- Divide up work
